

## Description

Bimetal operated single pole motor protection control with automatic reset actuation, small physical size, reliable snap-action mechanism.

**Caution:** In specifying this product, care should be taken to ensure that automatic motor re-start does not represent a safety hazard.

## Typical applications

Motors, transformers, extra low voltage wiring.

## Ordering information

### Type No.

2-6500 surface type with flange

#### Terminal design

P10 blade terminals 6.3-0.8 (QC .250)

#### Shunt terminal (optional)

A3 blade terminals or solder terminals; max. load 5 A

#### Current ratings

0.1...10 A

2-6500 - P10 - ... - 6 A ordering example

The exact part number required can be built up from the table of choices shown above. Ordering references for optional features should be omitted if not required.

## Standard current ratings and typical internal resistance values

| Current rating (A) | Internal resistance ( $\Omega$ ) | Current rating (A) | Internal resistance ( $\Omega$ ) |
|--------------------|----------------------------------|--------------------|----------------------------------|
| 0.1                | 140                              | 2                  | 0.47                             |
| 0.2                | 47.5                             | 2.5                | 0.33                             |
| 0.3                | 20.5                             | 3                  | 0.212                            |
| 0.4                | 11.4                             | 3.5                | 0.155                            |
| 0.5                | 7.25                             | 4                  | 0.107                            |
| 0.6                | 5.35                             | 4.5                | 0.095                            |
| 0.7                | 3.8                              | 5                  | 0.072                            |

## Dimensions

## Typical time/current characteristics at +23 °C/+73.4 °F

## Internal connection diagram

The time/current characteristic curve depends on the ambient temperature prevailing. In order to eliminate nuisance tripping, please multiply the circuit breaker current ratings by the derating factor shown below. See also section Technical information.

| Ambient temp. °F<br>°C | +14<br>-10 | +32<br>0 | +50<br>+10 | +73.4<br>+23 | +86<br>+30 | +104<br>+40 | +122<br>+50 | +140<br>+60 |
|------------------------|------------|----------|------------|--------------|------------|-------------|-------------|-------------|
| Derating factor        | 0.84       | 0.92     | 1          | 1            | 1          | 1.08        | 1.16        | 1.24        |

This is a metric design and millimeter dimensions take precedence ( $\frac{\text{mm}}{\text{inch}}$ )

All dimensions without tolerances are for reference only. In the interest of improved design, performance and cost effectiveness the right to make changes in these specifications without notice is reserved. Product markings may not be exactly as the ordering codes. Errors and omissions excepted.
